

Instructions for configuring Norton Internet Security 2005 to work with ProQuest

1. Open Norton Internet Security 2005.
2. Click on Privacy Control

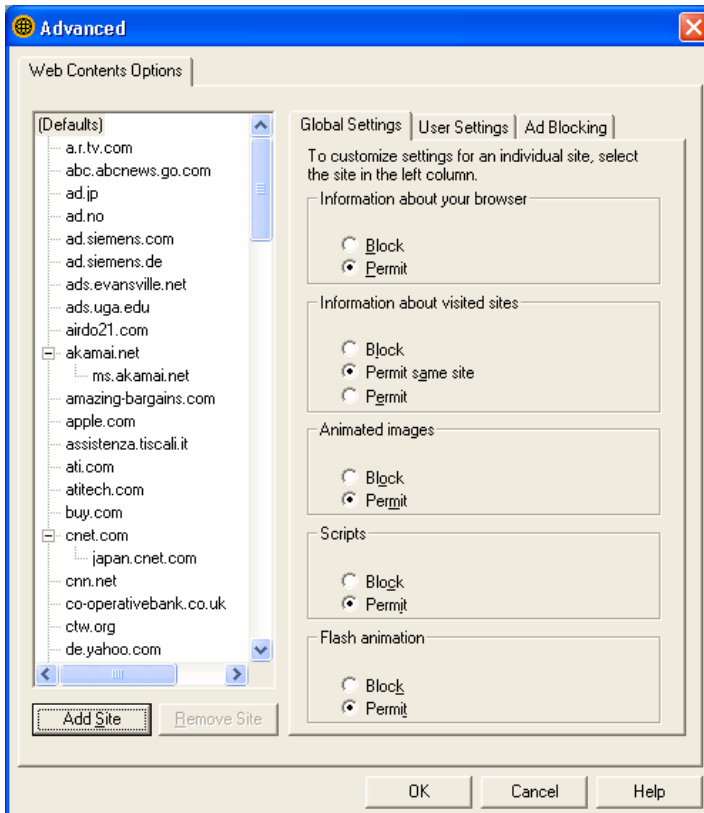

3. Click on configure.

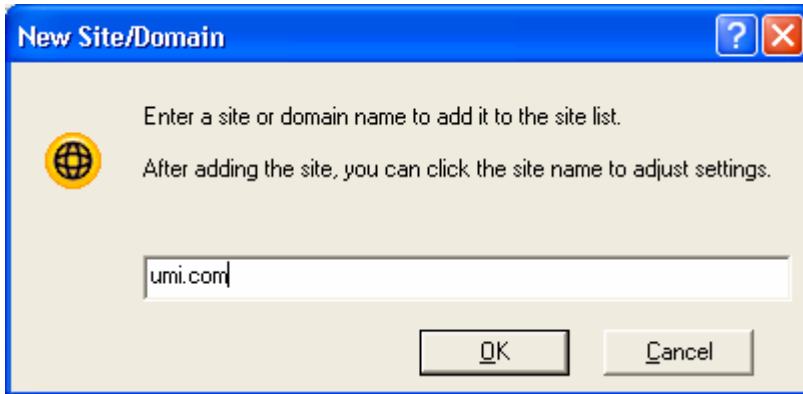

4. Click on Advanced.

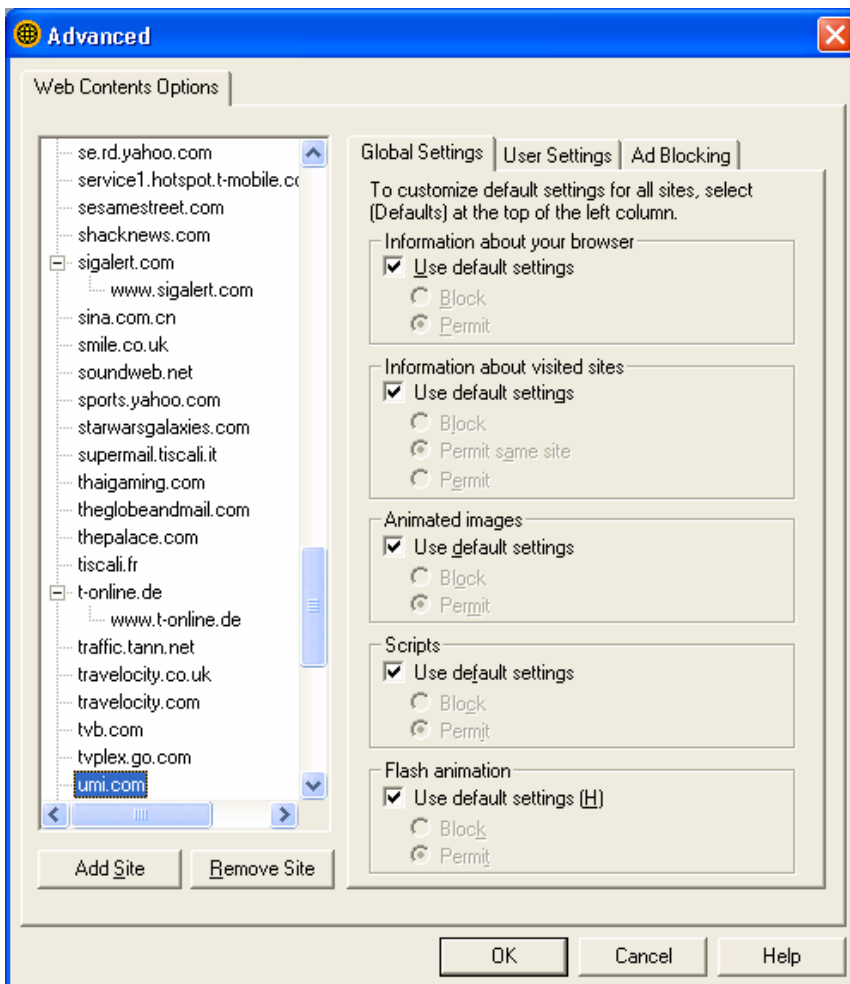

5. Click on Add Site.

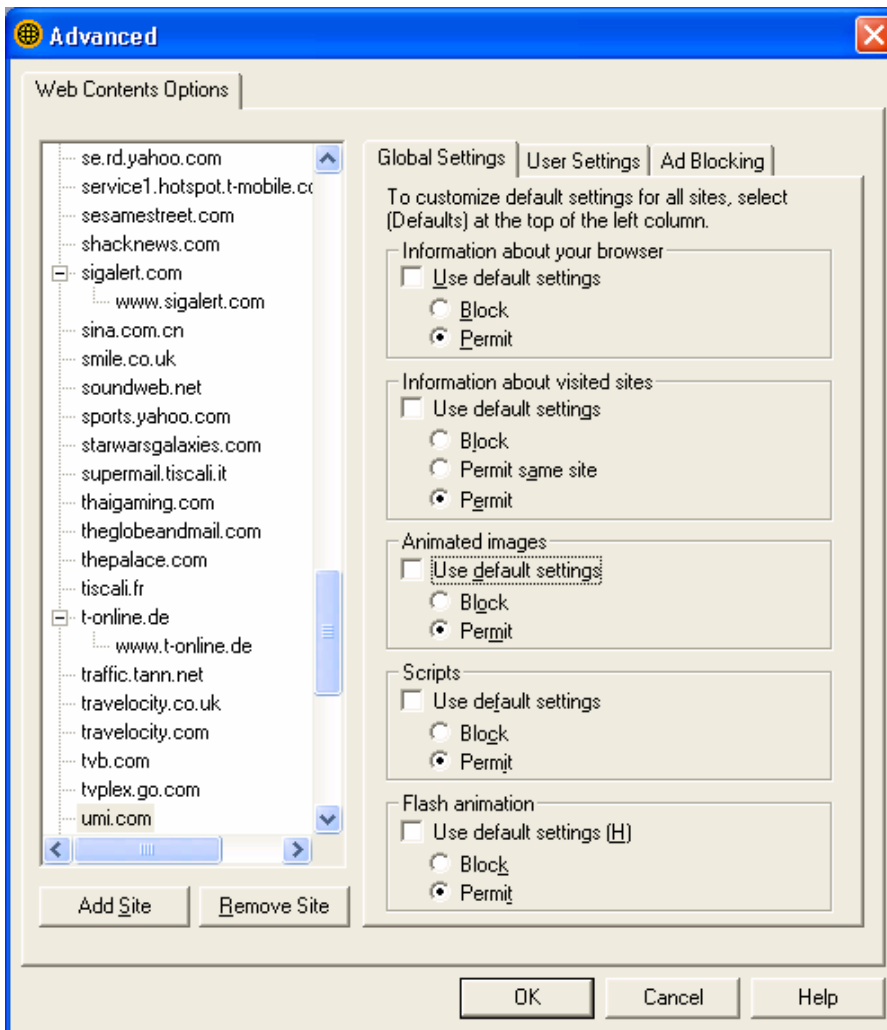

- Remove the www. from the box and type in umi.com.

- Choose umi.com from the list.

8. Uncheck “Use default settings” for all options under the global settings tab.
9. Choose Permit for all options under Global Settings tab. (Note: Under Information about visited sites, choose Permit and not Permit Same Site)

10. Repeat steps 5-9 but use proquest.com instead of umi.com.
11. Click Ok.
12. Log into ProQuest through your library.
