| Multiple Attempts | Not allowed. This Test can only be taken once. |
| Force Completion | This Test must be completed now. |
| ▼ Question Completion Status: | |
| Question 1 | 1 points Save |
| This term encompasses such fields as neuroanatomy, cognitive neuroscience, and biological psychology. | |
| <input type="radio"/> a) cognitive science | |
| <input type="radio"/> b) pathology | |
| <input type="radio"/> c) psychology | |
| <input type="radio"/> d) neuroscience | |

Next to each question is its point value as well as a button to save your response to that question

1 points [Save](#)

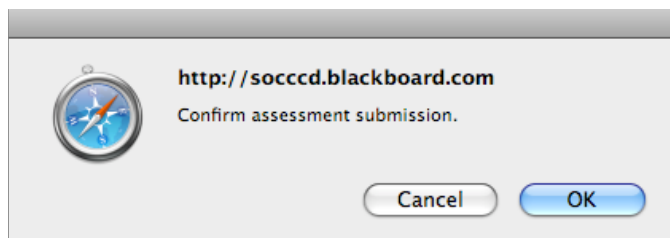

Saving each question's answer makes sure that you don't run out of time and not submit any answers. I highly recommend it.

Once you are done with all of the questions, click on the Save button to save your answers, then the Submit button to submit your test.

Save

Submit

You will see a confirmation window as shown on the right.

Now you can click OK to review your results directly and see how you did on the Quiz. Correct answers will be shown along with your responses. You will be able to check your grade on the quiz instantly in your gradebook as well.

Recommendation: Make sure you have at least 30 minutes without interruptions before starting your quiz. I recommend taking it in the library or in the computer lab or somewhere else with a reliable connection. Quizzes that were not submitted in time due to connection failures are not my problem. This is why I recommend that you save every answer once you are sure of it.
